SUMMARY

Full Stack Developer with 3+ years of experience building scalable enterprise applications using ASP.NET Core, React.js, and SQL Server. Skilled in developing ASP.NET Core Web Services, Microservices, secure RESTful APIs, and Clean Architecture solutions using CQRS and MediatR. Experienced in developing and deploying cloud-native applications using Docker, Azure DevOps, and AWS.

TECHNICAL SKILLS

- **Programming Languages:** C#, JavaScript, TypeScript, Python
- **Backend:** ASP.NET Core Web API, ASP.NET MVC, Entity Framework Core (EF Core), ADO.NET, LINQ
- **Architecture & Design Patterns:** Clean Architecture, Microservices, CQRS, MediatR, Repository Pattern, Dependency Injection
- **Frontend:** React.js, HTML5, CSS3, JavaScript, TypeScript, jQuery
- **Database:** Microsoft SQL Server, Redis
- **Cloud & DevOps:** AWS (Lambda, S3, Cognito), Docker, Azure DevOps, CI/CD Pipelines
- **Security & API Development:** RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), OpenAPI/Swagger
- **Logging & Monitoring:** Serilog
- **Resilience:** Polly
- **Messaging & Integrations:** Firebase Cloud Messaging (FCM)
- **AI Tools:** GitHub Copilot, Codex, Cursor
- **Tools & Version Control:** Git, Postman, Visual Studio 2022, Visual Studio Code

PROFESSIONAL EXPERIENCE

PRM Soft Solution Pvt. Ltd. | Pune, Maharashtra

Junior Software Developer | Dec 2024 – Present

- Developed and maintained scalable ASP.NET Core Web Services using Microservices Architecture for enterprise business applications.
- Designed and implemented secure RESTful APIs with JWT Authentication and Role-Based Access Control (RBAC) for distributed systems.
- Applied Clean Architecture, CQRS, MediatR, and Dependency Injection to improve code quality, scalability, and maintainability.
- Optimized SQL Server and EF Core queries, reducing API response times by 20–30% and improving application performance.
- Integrated React.js frontends with ASP.NET Core Web APIs and implemented OpenAI APIs and Firebase Cloud Messaging (FCM) for AI-powered features and real-time notifications.
- Containerized services using Docker and supported deployments through Azure DevOps CI/CD and AWS, improving deployment consistency and release efficiency.
- Collaborated with cross-functional Agile teams to deliver 20+ production features, ensuring timely releases and high-quality software delivery.

Sandeep Venture Pvt Ltd | Pune, Maharashtra

Junior Software Developer | July 2023 – Nov 2024

- Developed and maintained a full-stack FinTech billing application using ASP.NET Core and SQL Server to manage invoicing, financial transactions, and client ledger data.
- Developed interactive React.js dashboards with real-time financial visualizations, improving business reporting and decision-making.
- Resolved critical production issues, refactored legacy modules, and optimized SQL Server queries to improve system performance and reliability.

PROJECTS

Crowdsourcing Platform | .NET 8, ASP.NET Core Web API, React.js, Microservices, EF Core, Docker, SQL Server, Redis, RabbitMQ, Serilog, Polly

- Developed a full-stack crowdsourcing platform using React.js and ASP.NET Core Web APIs based on Microservices and Clean Architecture.
- Implemented JWT Authentication, Refresh Tokens, Role-Based Access Control (RBAC), global exception handling, and user-context middleware for secure user access.
- Built RESTful APIs using EF Core, the Repository Pattern, and Redis for caching to improve application performance.
- Integrated RabbitMQ for asynchronous communication between microservices and Serilog for structured logging and centralized request tracking.
- Containerized backend services using Docker for consistent development and deployment across environments.
- Integrated SHA-256 cryptographic hashing to provide tamper-resistant data validation and enhance data integrity.

AI-Based Industrial Robot Fault Detection | Python, Scikit-learn, XGBoost, Random Forest, Pandas

- Developed a machine learning model to classify industrial robot faults using 50,000+ sensor records.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) using Pandas, NumPy, Matplotlib, and Seaborn.
- Trained and evaluated Random Forest, XGBoost, and Logistic Regression models using Scikit-learn.
- Built an end-to-end machine learning pipeline for fault prediction and feature importance analysis to support predictive maintenance.

EDUCATION

Shri Chhatrapati Shivaji Maharaj College of Engineering (SPPU) | Ahilyanagar

Bachelor of Engineering in Computer Engineering | Aug 2019 – July 2023

- **CGPA:** 8.55/10

ADDITIONAL INFORMATION

- **Publications:** "Enriching Trustworthy Trade Decentralized Systems Using Blockchain" | *IEEE* 2023
- **Languages:** English, Hindi, Marathi
